

At NorCal Airgun Club (NCAGC), PFT match consists of a course of fire ranging from one to three shots at each target placed at distances of 10-35 yards. The kill zones of the targets vary from $\frac{3}{4}$ inches to 2 inches in diameter. The kill zone size for **NCAGC** PFT course of fire should average greater than 1 inch diameter for the entire course for most matches.

NCAGC Pistol Field Target Divisions:

1. Any Position - Any Sights.
2. Any Position - Open Sights.

Summary Rules

This is a condensed summary of the detailed rules. This short list of rules is the most used and gives the basics a competitor needs for a match. The detailed rules shall take precedence where there is a question on the meaning or intent of a rule. The detailed rules may be found on the **NCAGC Documents** web page in an Adobe Acrobat file for downloading. The rulebook on the Documents page also contains guidance on how to run a PFT match, as well as appendixes to assist organizing the match. The Troyer factor for PFT is also covered in detail in one of the many appendixes of that document. It is a 3 meg download, and contains EVERYTHING about PFT at the NorCal Airgun Club.
